

PROMOTING THE CIRCULAR ECONOMY

Clingfoil is committed to giving our customers the tools and knowledge to be able to use packaging in a way which mitigates the impact to our environment as much as possible.

Using the principle of the Circular Economy, we can advise on the methods and products which will improve sustainability in the business that we do together.

GUMMED PAPER TAPE

Water activated and made entirely from renewable resources, enabling it to be easily recycled along with the box it sealed. Aesthetically pleasing, cost effective and offers the highest level of security through tamper evidence.

SELF-ADHESIVE PAPER TAPE

An environmentally responsible alternative to polypropylene case sealing tapes. The craft finish offers excellent presentation and our bespoke printing option can deliver a strong message.

EVERGREEN PACKING TAPE

A new generation self-adhesive tape, pairing strong adhesion with the ability to withstand temperatures close to 0°C. Easily distinguished with its green colour, but it is clear on application.

BOXES

Made from wood fibre our boxes are 100% recylable!

CORRUGATED BOXES

Durable, strong and made from renewable and recylable material. Single wall, double wall or triple wall? We can help you make the most suitable choice for your operation. Why not let us personalise these for you?

BOX DESIGN

Improve the efficient protection of your products using clever designs, such as die-cut or crash lock boxes. Our team will design and sample new ideas to reduce the amount of material that you need to use.

PULP INSERTS

Biodegradable, recyclable and compostable pulp inserts can be a lightweight alternative to thermoformed plastics.

VOID FILL

One of the most wasteful actions is to send out a parcel twice due to damage. Clingfoil's vast range of protective packaging and void fill can help.

PAPER VOID FILL 100% Recyclable

100% Recyclable and reuseable, all while being highly effective product potection, leaving you feeling confident your packages will arrive safe and sound.

AIR CUSHIONS

Made from very thin polythene our air cushions are 99% air, tear resistant, durable and reusable.

A space saving and protective solution which can be fully recycled using the normal household collections.

BAGS

PAPER BAGS

Our paper postal bags deliver an eco-friendly message, as they are degradable, compostable and easily recycled. We can promote your brand using bespoke printing.

POLYTHENE MAIL BAGS

Made from 100% recycled content, a clean, effective, water-resistant and efficient way to send out garments and small items. We can promote your brand using bespoke printing.
