

SIAT S8 CASE TAPING MACHINE

Clingfoil

- The SIAT S8 and S8/4 are suitable for different sized boxes and can be manually adjusted to suit. This is a manually fed, pre-set case sealing machines suitable for sealing a wide range of case sizes up to 500 x 500mm. They are quick and easy for any operator to set up and run. They use side drive belts to transfer the cases as this allows the taping heads to get closer to smaller cases. Reliable, low maintenance SIAT K11 top and bottom taping heads are used to apply 50mm wide self-adhesive tape for a perfect seal time after time.
