Elite HAND STRETCH WRAP

Did you know?

All of our stretch wrap is made on site at our warehouse here in the UK!

WE CAN SAVE
YOU UP TO 50%

- Strong film that keeps your items stable and secure
- Developed to supersede thicker films without compromising load stability
- Less film is required to wrap a pallet, reducing film usage by up to 50%
- Elite stretches and locks out, improving load stability and holding force
- Manufactured from high quality clear films available in a range of sizes and colours (Blue, red, green and black)
- Produced on site for a quicker lead time

KEY FEATURES

-  High performance
-  Improved load stability
-  Reduce packaging waste
-  Very strong & lightweight

MACHINE STRETCH WRAP

INFINITY NANO FILM

Wrap 30% more pallets per hour!

Stronger. Infinity film can stretch up to 320%

Significant increase in load stability

up to 50% reduction in plastic consumption

Use up to 50% less film to wrap a pallet

More film per roll and less production/line stoppages.

Lock out technology takes load stability to a new level

STRETCH WRAP MACHINES

Reduce plastic - improve load stability - wrap more pallets

FM50 EASY WRAP

Cost effective and perfect for minimising health and safety risks

- Simple to operate with no electrical components
- Tightly wrapped pallets with minimum film usage
- Reduces health & safety issues. NO back injuries NO walking backwards and LESS fatigue
- Equip with an adjustable film break, allowing for thin and pre-stretched films to be processed

SIMPLY

Simply economic and easy to use. Perfect for wrapping 10-30 pallets per day.

- Max load weight 1500kg
- Load height sensing photocell
- Ideal for use with pre-stretched films, but can also be used with films without a cardboard core
- Speed of carriage separated adjustable in upwards & downwards movement

SAVING MACHINE

The simple and economic choice.

- Max load 1500kg and wrapping height of 2000mm
- Reduce packaging waste
- Wrap up to 20 pallets per hour and maximise your film usage
- Speed of carriage separated adjustable in upwards & downwards movement
- Stretched film up to 250% improving your load stability

MOTION

A self-propelled wrapping machine for wrapping pallets of any size, weight and shape.

- High frequency battery charger integrated
- Opening for forklift left & right
- Wrapping height max. 2200mm
- Load height sensing photocell

LOAD STABILITY

Load stability is crucial for the transit of your goods. Our team are experts that can help determine what you need to improve your load stability. The Clingfoil load stability range includes:

- Edge boards:
- Slip sheets
- Top sheets
- Stabustrap

Speak to our team today for a load stability audit!

TOP SHEETS

Polythene sheets that will protect your pallets from dust and the elements.

STABUSTRAP

Cost-effective and 100% recyclable strap that will increase your load stability.

EDGE BOARDS

Cost-effective and efficient way to protect box edges and stabilise your pallet.

SLIP SHEETS

Stabilise your pallets and prevent slippage in transit.

TAPES

SELF ADHESIVE PAPER TAPE

Self-adhesive and eco-friendly.

- Easily applied with or without a tape dispenser and available in machine rolls
- 100% recyclable and biodegradable
- Offers a strong, and long lasting bond
- Available in plain or printed

PRINTING AVAILABLE

SELF ADHESIVE MACHINE PAPER TAPE

Strong adhesive paper tape for machines.

- Easily applied with or without a tape dispenser
- Strong adhesion in high and low temperatures
- 100% Recyclable and biodegradable
- 300 meter rolls

WATER ACTIVATED TAPE

The ultimate eco-friendly case taping method.

- Available in plain, white or printed
- Secure, offering the highest level of tamper evidence
- 100% Recyclable and biodegradable without needing to be separated from cardboard
- Cost effective, as less tape is required for a satisfactory seal

PRINTING AVAILABLE

TAPE MACHINES

Water activated tape is a cost effective, environmentally friendly and a more secure taping solution.

NEW

WATER ACTIVATED TAPE MACHINE

New manual water activated tape dispenser

- No electricity required
- Portable, lightweight design, perfect for limited workspaces
- Refillable and spill-resistant water tank holds 227ml of water activating 114 meters of tape
- Soft touch tape delivery, dispensing 254mm of tape; repeat push lever for longer tape length

ELECTRONIC WATER ACTIVATED TAPE DISPENSER

- Heavy duty, self oiling blade
- High capacity water bottle wetting up to 3,600 meters of 70mm wide tape
- Tape length adjustable in 0.5" increments up to 3050mm

PRINTING AVAILABLE

PRINTED TAPES

Designed to make your packaging process quicker and more efficient.

- Widths between 12mm and 75mm held in stock in clear, brown, and coloured varieties
- Personalised printing available to reinforce brand recognition
- Water-based acrylic, hot melt or solvent

NEW

**100% Recyclable
Solvent free tape**

EVERGREEN TAPE

New generation strong, eco-friendly adhesive tape.

- Available in hand rolls or machine rolls
- Recyclable in a self adhesive polypropylene
- Performs well in temperatures close to 0°C
- Easily applied with or without a tape dispenser
- 990m machine rolls now available

Streamline your packaging line with Clingfoil!

CARTON SEALING MACHINE

Semi-automatic case taping machine incorporates case taping technology with automatic adjustment for different sized cartons which will detect the height and the width of the box as it is loaded onto the conveyor.

- Simultaneous top and bottom carton sealing
- Increased productivity and consistent finish
- Packing speed up to 35 cartons per minute
- Great stand alone machine that can easily be integrated into your production line

Clingfoil will help you...

SAVE TIME

SAVE MONEY

REDUCE PLASTIC

BOXES

PRINTING AVAILABLE

CRASH LOCK BOXES

Designed to make your packaging process quicker and more efficient. When opened the base locks into place no tape required!

- Available in a range of sizes, suitable for products most shapes and sizes
- Featuring a self-seal adhesive strip and tear strip
- 100% recyclable and biodegradable
- Reduce your packing time to as little as 9 seconds

Reduce your packing time by **60%!**

Step 1: Grab your box

Step 2: Pop open your box & pack it

Step 3: Seal your carton

REGULAR CARTONS

Our regular cartons can be made to any size you require, all we need to know is what board grade you would like (single wall, double wall or triple wall), and the dimensions. We can even have these printed to match your branding.

DIE CUT BOXES

Our die cut boxes are available in a range of standard designs that we can adapt to ensure the perfect size and strength for your product.
